Technical Report No. 63**

September 1995

OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Letterkenny Army Depot in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Letterkenny Army Depot began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Pennsylvania Historical and Museum Commission in Harrisburg, Pennsylvania. The records search was performed at the Pennsylvania Historical and Museum Commission in April 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. A draft Section 6 summary letter is enclosed for these tribes (Appendix I), as well as a listing of the current tribal chairpersons (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT LETTERKENNY ARMY DEPOT

Archaeological work on Letterkenny Army Depot began in 1980. Archaeological investigations, which included collecting artifacts, have been conducted by the following organizations:

John Milner Associates, West Chester, Pennsylvania
U.S. Army Corps of Engineers, Baltimore District, Maryland

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 115 artifacts and less than 2 linear feet of associated documentation have been identified for Letterkenny Army Depot. Artifacts recovered include prehistoric lithics, fire-cracked rock, and historic materials such as ceramics, glass, and nails. No human remains were excavated.

As of July 1995, the artifacts and associated documentation are located in the following repositories:

State Museum of Pennsylvania, Harrisburg, Pennsylvania	115 artifacts and associated documentation
U.S. Army Corps of Engineers, Baltimore District, Maryland	ca. 1 linear foot of associated documentation
John Milner Associates, West Chester, Pennsylvania	< 1 linear foot of associated documentation

The attached *Summary of Current Locations of Archaeological Collections from Letterkenny Army Depot* (Appendix III) provides detailed information about each collection

NATIVE AMERICAN TRIBES ASSOCIATED WITH LETTERKENNY ARMY DEPOT

Several Native American groups were living in Pennsylvania at the time of Euro-American contact. After contact, disease, warfare, and the westward push of Euro-American settlement triggered a series of Native population movements.

The Susquehannock (or Conestoga) are documented to have had a strong presence throughout central Pennsylvania prior to Euro-American contact (Martin and O'Leary 1990; Yenne 1986). Disease and warfare with the Iroquois Five Nations in the 18th Century left the tribe virtually extinct (Jennings 1978; Johnson 1993). The last survivors were killed by the rioting Paxton Boys in 1765 (Johnson 1993; Yenne 1986).

The Tuscarora traveled through Pennsylvania during their northern migration in the 1700s (Landy 1978). Bands of Tuscarora settled along the Susquehanna and Juniata Rivers before joining the Iroquois to the north (Terrell 1961). They were accepted as the Sixth Nation of the Iroquois in 1722 (Waldman 1988).

According to Miller (1994) and Weslager (1972), the Delaware (or Lenape) and related Munsee, Unami and Unalachtigo, originally inhabited much of eastern Pennsylvania and New Jersey. As they moved westward in the 1600s, bands of Delaware may have passed through the region that now encompasses Letterkenny Army Depot. By the 1700s, they reached the Ohio River area in Ohio. Individual bands moved on westward in the 1800s to Indiana, Missouri, Kansas and Texas, and ultimately were relocated to Indian Territory in Oklahoma (Miller 1994). Other bands moved north to Canada (Martin and O'Leary 1990). In addition to the federally recognized Delaware tribe in Oklahoma, some Delaware reside on the federally recognized Stockbridge-Munsee Indian Reservation in Wisconsin. Others live in the Munsee Delaware Community in Kansas (Martin and O'Leary 1990); this is not a federally recognized tribe.

In the late 17th to early 18th centuries, bands of Shawnee settled in Pennsylvania. While living in Pennsylvania, Shawnee frequently were in conflict with the colonists and with the Iroquois to the north (Neely 1994). In the 1800s, they too moved on to the upper drainage of the Ohio River (Callender 1978), and ultimately to Indiana, Missouri and Kansas (Neely 1994). They were relocated to Indian Territory in the late 1800s (Neely 1994).

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II).

Of the tribes referenced above, only the Absentee-Shawnee of Oklahoma, the Eastern Shawnee of Oklahoma, the Delaware of Western Oklahoma, the Stockbridge-Munsee in Wisconsin, and the Tuscarora Nation of New York are federally recognized.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM LETTERKENNY ARMY DEPOT, PENNSYLVANIA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

Summary of Current Location of Archaeological Collections From:

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
